## COMPANY OVERVIEW

Acube Innovations is an information technology enabler for our clients' success and efficiency. We specialize in software development, custom software solutions, and providing skilled IT professionals in the areas of Mobility, Web Applications, Security Testing, and Enterprise computing.

Since our inception in 2011, we have pioneered custom solutions that have become central components in our client's business success. Our vast technology and industry expertise enables us to partner with clients to deliver sophisticated solutions rapidly and on budget. For us, it is not only about delivering IT services, but also about playing a part in business efforts to shape a brighter and smarter future.

The company pioneered the application of Industrial Design concepts and approaches to the delivery of holistic IT enabled services and solutions. The fundamental business model is to be selective in customer engagements, favours long-term, value driven business relationships, and always tint all activities with its unique brand of creativity and innovation.

Today with the experience and knowledge that we gained from the past couple of years, we are carrying a new saga in the stream of telecommunication and other innovative web based solutions with Acube innovations Pvt Ltd.

## WHY ACUBE

We believe it's important to fully understand our clients' requirements by communicating continuously with them to refine requirements as we work on a project. We stay in touch with our clients through project collaboration tools, regular reporting, and online meetings. We work hard to tailor complete solutions to each client's unique needs and quickly deliver tangible value to every client. We listen to your ideas, delve into your concerns, and consider every aspect of your business processes, to choose the advanced technologies appropriate to your needs.

## MISSION STATEMENT

Our mission is to make technology an asset for your business, not a concern. We work around your business. We strive to make technology integrate seamlessly with your business so your business can grow. As your technology partner, when

# DOMAIN EXPERTISE

In a fast changing world where expertise can be defined in many different ways, Acube Innovations defines domain expertise as knowledge, experience and competence that have been acquired through a consistent track record of successful projects accomplished in various domain areas.

We have end-to-end software product development expertise in education / Student information Systems. Acube's deep and broad experience extends to almost every layer of the infrastructure technology stack.

Our approach is to utilize a team of domain experts to work collaboratively to meet the customer's product specifications and designs. This enables us to ensure that we deliver solutions that actually meet customer's expectations and in the shortest possible time.

# CLIENT CHALLENGES

- \* Limited availability of a skill pool with the requisite domain knowledge
- \* Ineffective processes leading to revenue loss and increased time-to-market
- \* Lack of best-in-class industry processes
- \* Scarcity of capital leading to unrealistic expectations of faster ROI
- \* Demand shift from established markets to the emerging market

You can make online communication audio, video, chat, share screens to us at, acubeco.
